Dear Sir/ Madam,

Action Super Abrasive Products is a leading manufacturer of Diamond & CBN grinding wheels. ASA originated in 1982 is privately owned and we have over 30 staff to manufacture, support and serve you.

'We have the reputation of the best service and delivery in the industry 'and Action Super Abrasive is an ISO 9001 registered company.

ASA manufactures a complete line of Resin bond, Polyimide bond, Vitrified bond, Metal Bond and Electroplated products.

We specialise in the CNC Tooling (for both Carbide & Steel), Automotive, Aerospace, Oil & Gas, Ceramics, Thermal Spray, PCD/PCBN and Medical industries throughout the world.

In Resin bond products we manufacture up to 36" (920mm) in diameter, with a continuous rim on aluminium or powdered bodies.

We specialise in Centerless Wheels up to 24"(610mm) and up to 24"(610mm) wide in Single and Multigrit bands on powder bodies (Bakelite) and have layer depths up to and including 2" (50mm) available.

We also manufacture wheels for the Stahli, Peter Wolters, and other lapping fine grinding machines up to 48" (1220mm) in diameter with any pellet shape needed.

Double disc grinding wheels for any applications and finally a very comprehensive line of wheels for the Carbide/HSS tooling industry.

In the Electroplated product line we manufacture product up to and including 18" diameter with 'any' form necessary to do the job.

Action Super Abrasive utilizes the latest technology in regards to our operating software.

All of our products (In Both our Plants) are designed, engineered and manufactured in house which the reason why our manufacturing lead times (2/3 weeks or less) is so great.

We also have a dedicated A.S.A. Manufacturing Plant in Switzerland to also fully compliment 'ALL' the CNC industry.

ASA (Action Super Abrasive SA), company founded in 1993, is specialised in the development and production of Diamond and CBN grinding wheels with Resin, Polyimide, Hybrid and Metal Bond used for the CNC tool grinding Industry for ALL Machines, including specialised wheels for the Micro Drill/Tool Industry.

Recently released Our 'NEW'
ASA-250 (5 Axis Semi Automatic Dressing Machine).
(please ask for details)

From the very beginning Action Super Abrasive SA has attached a fundamental importance to its production quality and flexibility.

Our main goals still lie today in the ability to provide a product from the conception stage to a finished unit or volume produced products in a consistent short prompt period of time.

Our years of experience and knowledge has granted us a big advantage to advise our customers and in developing specific bonds for each grinding application. The constant improvement of our wheel production equipment and a very up to date laboratory ensure highest quality and reliability in production.

We welcome the opportunity to working with you and your company and please don't hesitate in requesting an onsite technical support visit.

'Let us demonstrate how we can help you'.
